

SQL Challenge

Create SQL code for the following:

Average cost per click:-

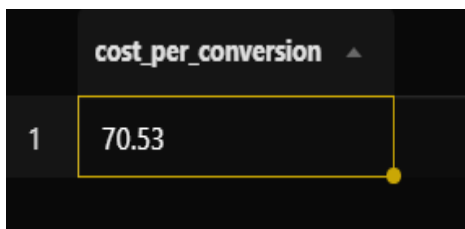

```
SELECT ROUND(SUM(expense)/(SUM(clicks)),2) AS cost_per_click  
FROM campaign;
```

	cost_per_click ▲
1	16.37

Average cost per conversion:-

```
SELECT ROUND(SUM(expense)/(SUM(conversions)),2) AS cost_per_conversion  
FROM campaign;
```

	cost_per_conversion ▲
1	70.53

Audience Segment Performance:-

```
SELECT a.audience_name, c.views, c.likes, c.clicks,  
c.conversions, c.expense, c.total_sales
```

FROM campaign c

LEFT JOIN audience a ON a.audience_id = c.audience_id

GROUP BY a.audience_id;

	audience_name ▲	views ▲	likes ▲	clicks ▲	conversions ▲	expense ▲	total_sales ▲
1	Female 18-40	30391	1700	2669	243	37425.85	42784.94
2	Female 60+	92422	8075	1360	182	43804.31	50878.17
3	Male 40-60	45934	2446	1655	669	36007.47	76729.41
4	Male 60+	52042	191	4242	753	48590.34	64163.39
5	Adults 18-40	23458	7718	1056	702	13961.03	0
